

€117.5k signs 100 maintenance hires by 31 Dec, if the client can assess 55 a week

€117.5k

budget: €99.8k plan + €17.7k reserve, released only on results

€998

media cost per hire (€1,175 if the reserve is spent)

98%

of 314 assessment slots used: capacity, not money, is the limit

Plan

- €750 test in every paid channel in weeks 1-2, then buy hires cheapest first.
- Three new sources bring ~42 hires: past applicants + referrals, construction electricians, Polish border towns.
- Pace ≤55 qualified a week; applications until Tue 24 Nov, signatures by Fri 18 Dec.

How sure: 100 if funnel rates hold; pass rate 10% worse → ~92; 30% less budget → ~87.

Role	Hires	Spend	€ / hire
Electricians	30	€38.0k	€1,266
Mechatronics	45	€28.9k	€643
Automation	15	€17.4k	€1,158
Supervisors	10	€15.5k	€1,550
Total	100	€99.8k	€998

⚠️ Top 3 risks → what I'll do

- Assessment capacity:** pace ≤55 a week, pre-screened sources first, ask for +9 slots.
- Electrician supply:** construction-electrician route needs your OK by 23 Oct; without it €127.5k.
- Christmas:** offers within 3 days, e-signature, stop spend Tue 24 Nov.

🔗 What I need from you

- 55 assessments a week (+9 if possible)
- Day-1 export of past applicants (GDPR-checked)
- €1,000 referral bonus + one staff message
- Construction-electrician decision by 23 Oct
- Approve €117.5k

Working back from 100 hires: ~308 qualified applicants for 314 assessment slots

Role	Hires	App → qualified	Qualified → passed	Passed → offer	Offer → signed	Qualified needed	Applications needed
Electricians	30	25%	50%	90%	70%	95	381
Mechatronics	45	25%	55%	90%	75%	121	485
Automation	15	25%	45%	90%	70%	53	212
Supervisors	10	23%	40%	85%	70%	42	183
Total	100					311	1,260

Where the rates come from: IAB (about 1 in 4 applications is suitable), Gem (interview pass rates), German offer-acceptance surveys. Each one is labelled on the Assumptions tab.

Latest useful application: work back from the last signature, Fri 18 Dec: offer → signed 7 days, interview → offer 3, assessment → interview 8, application → assessment 6. So applications must arrive by Tue 24 Nov (supervisors Tue 17 Nov).

Capacity check

98%

308 qualified applicants in the plan (from 1,619 applications) against 314 slots: 55 a week × 40 assessment days ÷ 7.

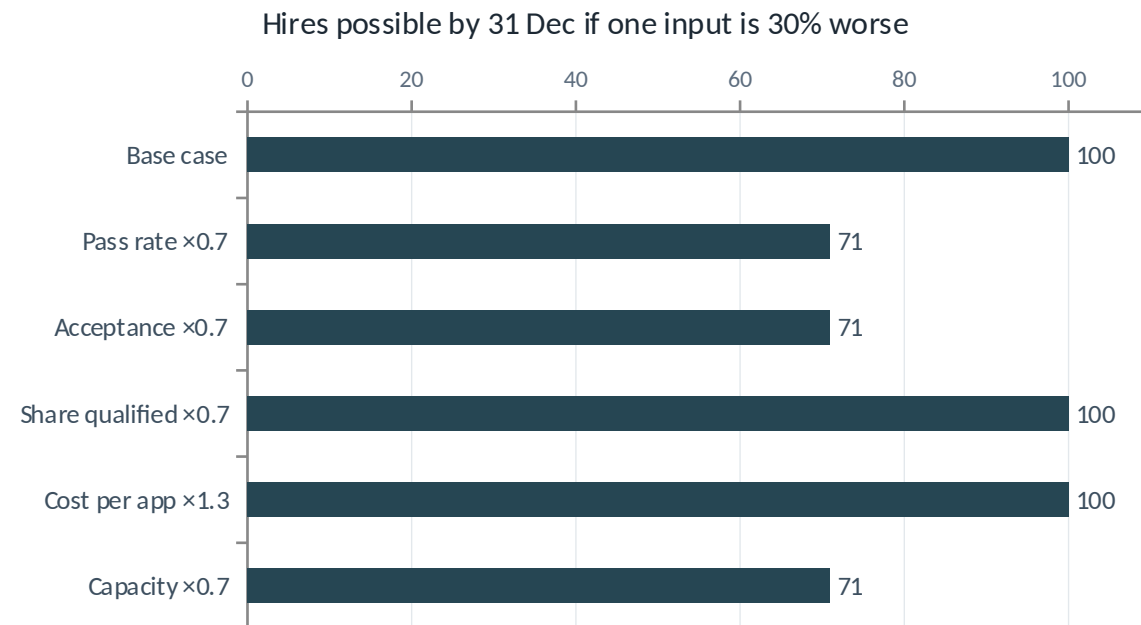

The plan fits, but with almost no headroom. Every week is paced to stay within 55 (Weekly tab).

Why 308, not 311: referrals and past applicants convert better than the table's standard rates, so the plan needs slightly fewer.

Electricians are hardest; a 30% worse pass rate costs ~29 hires that money can't buy back

Why electricians are hardest

- Scarcest trade in Brandenburg: 85.7% of vacancies have no suitable unemployed candidate, against 41.4% across all jobs (KOFA 2026).
- The biggest scarce block: 30 hires, 38% of the money.
- No back door: no Polish route, and foreign-trained electricians need 2–4 months of recognition.
- Supervisors cost more per hire but are only 10, with internal promotion as a fallback.

Most sensitive: the pass rate. 30% worse means 440 qualified applicants for 314 slots, so only ~71 can be hired. Spending more doesn't help. A weaker share qualified or dearer clicks only cost money (+43% / +30% media), not hires.

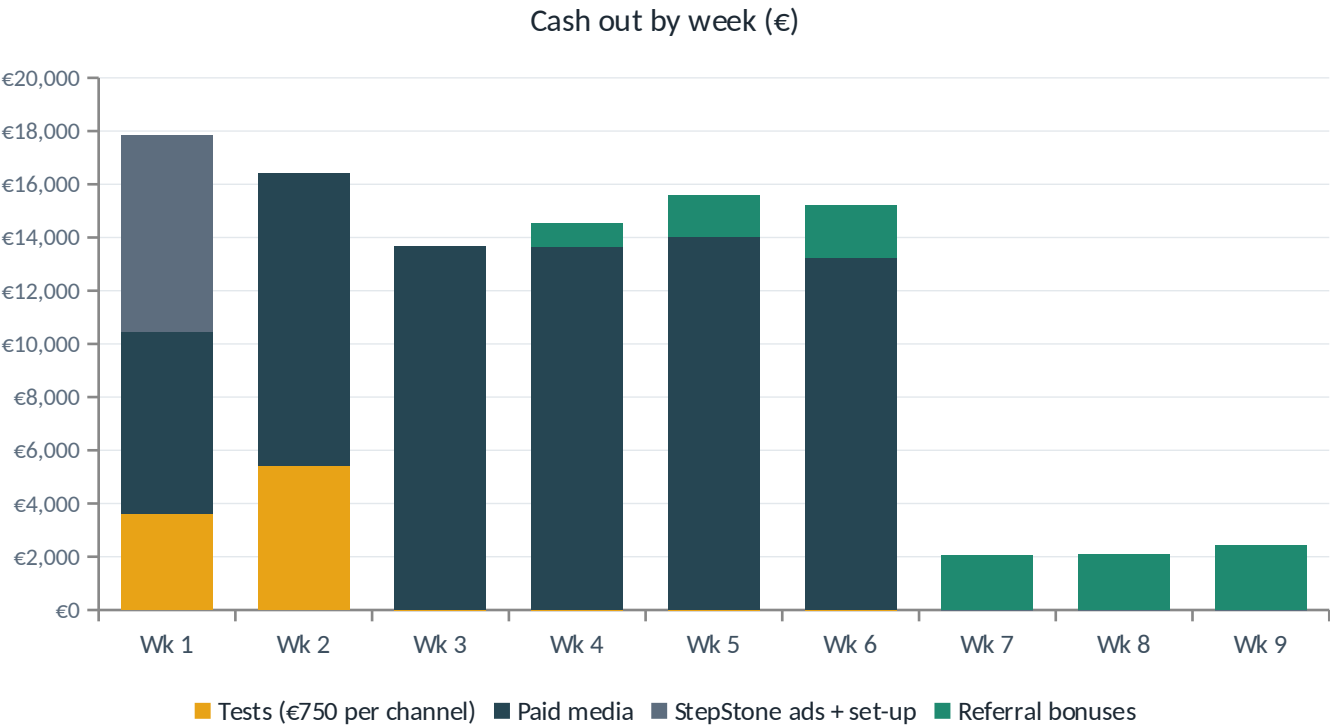

Every role buys its hires cheapest cost-per-hire first

Channel	Why	Cost per hire	Hires
Organic	Free: careers site, BA Jobbörse, Google for Jobs	€0	20.3
Rediscovery	Past applicants, already screened	€14	4.6
Polish corridor	Large pool across the border (≤40% of mechatronics)	€383	18.0
Referrals	Staff know the job; €1,000 bonus on signing	€1,000	11.0
Handwerk→Industrie	Construction electricians: a new pool for the hardest role	€1,329	8.4
StepStone	Germany's main CV job board	€1,564	3.7
LinkedIn	PLC and Meister profiles (automation, supervisors)	€1,687	16.1
Meta	Reaches people who aren't job-hunting	€1,963	13.3
Programmatic	Indeed and other boards, paid per application	€2,317	3.8
Google Search	High intent, but the dearest	€3,393	0.9

How it works

- Cost per hire = cost per application ÷ share qualified ÷ qualified → signed.
- Each channel is capped by how many people in the local talent pool it can reach.
- Every paid channel gets a €750 test first; the dearest (Search, most programmatic) stay at test level.
- Joveo upside: Joveo's own manufacturing cases cut cost per application 17–32%; on programmatic that takes the budget to €107.5k–€112.5k.

€99.8k planned across roles and weeks, plus a €17.7k reserve

Weeks 1–2 carry the tests, StepStone ads and set-up; weekly spend then follows the pacing that keeps assessments within 55 a week.

Role	Spend	Hires	€ / hire
Electricians	€38.0k	30	€1,266
Mechatronics	€28.9k	45	€643
Automation	€17.4k	15	€1,158
Supervisors	€15.5k	10	€1,550
Total	€99.8k	100	€998

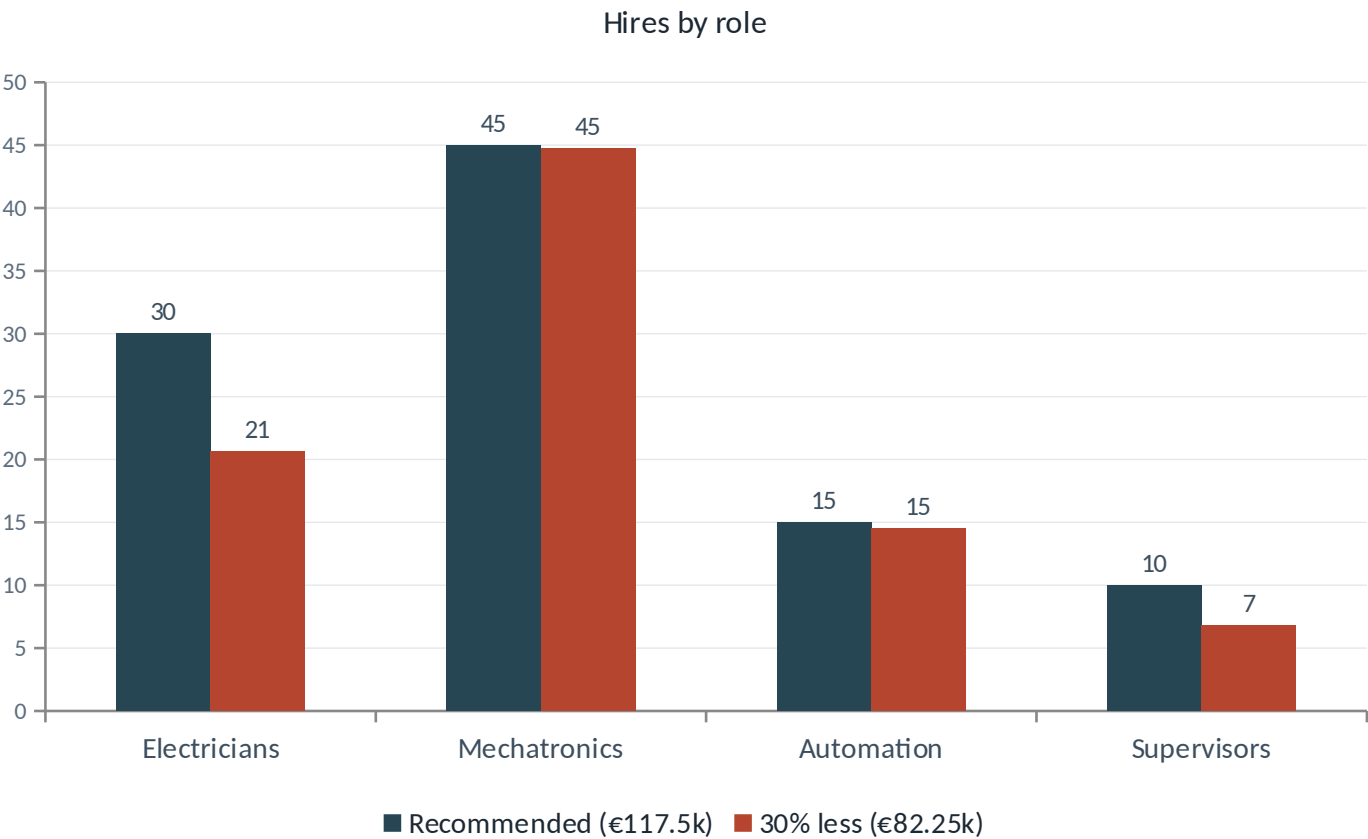

Testing: €9.0k in weeks 1–2 (€750 per paid channel and role).

Moving money: weak channels cut from Mon 2 Nov; tests judged by Mon 9 Nov.

Reserve: €17.7k (15% + rounding), released from week 3 only on results.

Spend stops: Tue 24 Nov, the last useful application date.

30% less (€82.25k) signs ~87; electricians fall short first

Budget	Hires	€ per hire (all-in)
100% • €117.50k	100	€1,175
85% • €99.88k	94	€1,064
70% • €82.25k	87	€949
50% • €58.75k	76	€774

Rule: cut the most expensive cost-per-hire channels first; keep the reserve at 15%.

Falls short first: electricians 20.6 of 30, supervisors 6.8 of 10, automation 14.5 of 15, mechatronics 44.7 of 45.

What I'd tell the client: the last €35.25k buys ~13 hires, mostly electricians, the people who keep the lines running. Keep it. If you must cut, cover supervisors by internal promotion and protect electricians.

Three new sources supply ~42 of the 100 hires, one built for electricians

I1 • ATS rediscovery + referral sprint

Who: 211 past runners-up (consented, last year) + staff referrals

How: Email + SMS waves on days 2, 7 and 14; €1,000 bonus per signed referral

Why better: Already screened and already wanted Tesla; ~€3 per application

Maths: €63 + €11.0k bonuses → 25 re-apps + 66 referrals → ~42 qualified → ~16 hires

2-week test: Wed 21 Oct – Tue 3 Nov (waves 1–3): €63. Pass: ≥10 qualified. Kill: <6 → no further re-contacts; bonus stays live

Who does what: Me: copy, segments, tracked links. Client: GDPR-checked export, bonus approval, one staff message

I2 • Handwerk → Industrie (electricians)

Who: ~10,000 construction electricians within 75 km

How: Social and search ads with a 6-question quiz; Tesla runs a 2–4 week bridge course

Why better: Certified electricians who never search for plant jobs; doubles the hardest pool

Maths: 118 apps × €84 = €9.9k + €1.2k set-up → 30 qualified × 28% = 8.4 hires (€1,329/hire)

2-week test: Fri 23 Oct – Thu 5 Nov (read Mon 9 Nov): €3.9k. Pass: ≥4 qualified at ≤€500. Kill: <3, >€670 per qualified, or profile rejected

Who does what: Me: ads, quiz, copy; live 23 Oct. Client: profile sign-off by 23 Oct, bridge plan

I3 • Polish border corridor + pre-screener

Who: Mechatronics workers in Polish border towns, 60–130 km away (EU)

How: Polish job boards and Meta; a Polish-speaking freelancer phones each applicant (15 min)

Why better: ~2,000 Polish trade workers already commute to Brandenburg; the call checks language before using our slots

Maths: 346 apps × €18.75 + €400 → 48 qualified × 37% = 18.0 hires (40% of mech, cap 40%)

2-week test: Tue 27 Oct – Mon 9 Nov (freelancer starts 27 Oct): €2.5k. Pass: ≥9 qualified at ≤€200. Kill: <5, >€270 per qualified, or too few pass the language call

Who does what: Me: ads, freelancer, call script. Client: approve the Polish ads

Repeatable Joveo product: ATS rediscovery. every employer holds consenting past applicants that nobody re-markets. Here 211 records cost ~€14 per hire and fill week-1 slots. Joveo could add them as one more tracked source in any market, with no local staff.

Track by source × role weekly, move money on rules, test the riskiest assumptions early

Track (every Monday)

- Spend → applications → qualified → assessed → passed → offers → signed, by source × role
- Data: Joveo tracked links + Monday ATS export (source tag), recruiter codes, pre-screener sheet
- Tracker tab turns this into decisions and a hire forecast

Money rules

- Judge a channel only after €500 or 30 applications
- 20% cheaper than plan → +25% a week from the reserve; 50% dearer → halve; 2× → off
- Over 55 qualified next week → pause the dearest; under 50 → release reserve

Check by Mon 2 Nov (confirm 9 Nov)

- Pass rate after 10 interviews: if low → sharper screening, more slots (10% lower ≈ 92 hires)
- Construction electricians: if stopped, programmatic fills the gap (€127.5k)
- Real test costs: re-rank channels; acceptance read after 5 offers

First five things in week 1

- Tue 20 Oct: kick-off with client; lock slots, 18 Dec date, bonus; request ATS export
- Tue–Wed: launch channels and tests with tracked links
- Wed 21 Oct: past-applicant wave 1 + referral launch
- Wed–Fri: Polish ads + freelancer; construction campaign live 23 Oct
- Mon 26 Oct: first read-out
