

€117.5k signs 100 maintenance hires by 31 Dec if the 55 weekly assessments hold

€117.5k

recommended budget: €99.2k
planned + €18.3k reserve
released only on results

€992

media cost per hire (≤€1,175 if
the reserve is spent); excludes
Joveo fees

98%

of 314 assessment slots used
(308 qualified). Capacity, not
money, is the limit

24 Nov

last useful application (17 Nov
for supervisors): signatures by
Fri 18 Dec

How sure: 100 if the funnel rates hold, with slots 98% used.
Pass rates 10% worse: ~92 hires (slots run out); 30% worse: ~71.
With 30% less (€82.25k): ~87 hires; electricians fall short first
(20.7 of 30).

Role	Hires	Spend	€ / hire	Main sources (hires)
Electricians	30	€37.9k	€1,264	Handwerk→Industrie 8.5 · Meta 6.3 · organic 5.9 · referrals 3.3 · programmatic 2.8 · other 3.3
Mechatronics	45	€27.4k	€610	Polish corridor 18.0 · organic 10.4 · referrals 5.8 · Meta 5.7 · rediscovery 2.4 · other 2.7
Automation	15	€17.6k	€1,175	LinkedIn 9.7 · organic 2.7 · referrals 1.5 · rediscovery 0.6 · tests 0.5
Supervisors	10	€16.2k	€1,620	LinkedIn 7.2 · organic 1.4 · referrals 0.7 · tests 0.4 · rediscovery 0.3
Total	100	€99.2k	€992	+ €18.3k reserve = €117.5k

Plan: €750 test in every paid CPC/CPA cell in weeks 1–2, then buy hires
cheapest-first: free channels → ATS rediscovery → Polish corridor (≤40%
of mechatronics) → referrals → construction-electrician campaign →
StepStone → LinkedIn → Meta → programmatic. Pace ≤55 qualified a
week; paid spend stops Tue 24 Nov.

Top 3 risks → response

Capacity: 98% used. Pre-screened sources first,
pace ≤55/wk, ask +9 slots/wk (64/wk → 85%
use, the utilisation standard).

Electrician supply: ~9 of 30 need your OK on
construction electricians by 23 Oct; without
them programmatic ads fill the gap and the
budget rises to €127.5k.

Christmas: 3-day offers, e-signature, 7-day offer
validity, stop spend Tue 24 Nov.

What I need from you

- 55 assessments/wk 22 Oct–30 Nov (+9 to reach 85% use)
- Day-1 ATS export (GDPR-checked) + utm source tags in ATS
- €1,000 referral bonus + one staff message
- Construction-electrician decision by 23 Oct
- 3-day offers, e-signature to 18 Dec; approve €117.5k

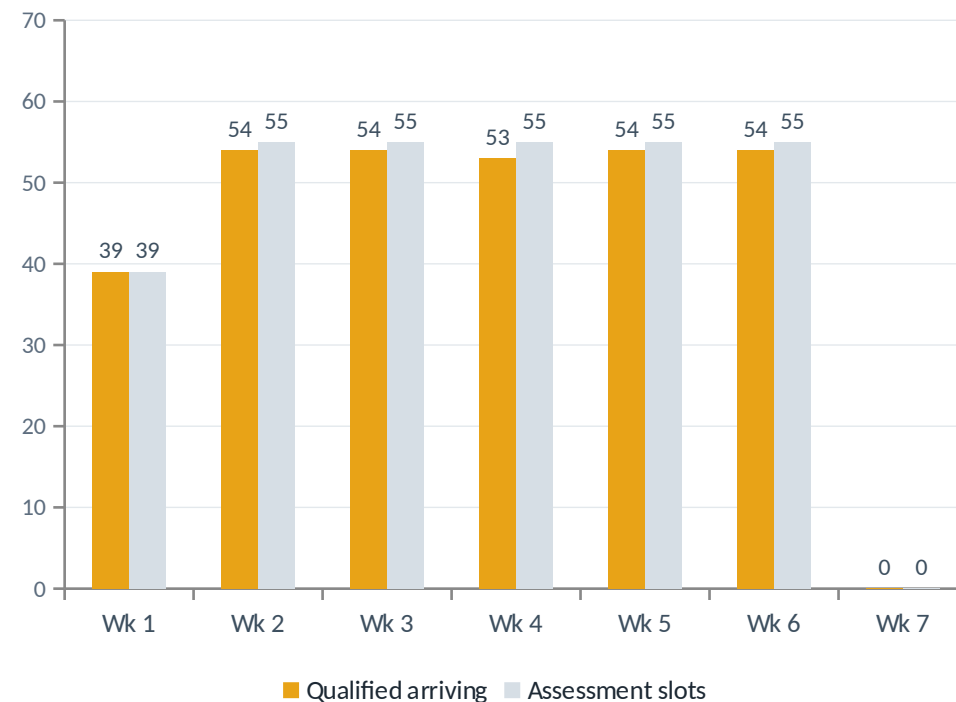

Working back from 100 hires: ~308 qualified applicants for 314 assessment slots

Role	Hires	App → qual.	Qual. → passed	Passed → offer	Offer → signed	Qual. → signed	Qual. needed	Apps needed
Electricians	30	25%	50%	90%	70%	32%	95	381
Mechatronics	45	25%	55%	90%	75%	37%	121	485
Automation	15	25%	45%	90%	70%	28%	53	212
Supervisors	10	23%	40%	85%	70%	24%	42	183
Total	100					32%	311	1,260

Where the rates come from. Sourced where data exists (IAB: 28% of applications suitable; Gem interview-pass and Königsteiner/StepStone offer-acceptance data), own estimates otherwise; each labelled on the Assumptions tab. Few applicants qualify (brief), and foreign-trained electricians can't be recognised in time (2–4 months, \$6 BQFG). Acceptance reflects counter-offers in Engpass trades. With the channel mix, the plan needs **308 qualified / 1,608 applications** (initiatives bring better-screened people).

Latest useful application. Application → assessment 6 days, → interview 8, → offer 3, → signature 7 (first two: SmartRecruiters DE benchmark); supervisors +7. Last realistic signature Fri 18 Dec, so applications must arrive by Tue 24 Nov (E/M/A) and Tue 17 Nov (supervisors). Slots = $55 \times 40 \text{ days} \div 7 = 314$.

Qualified applicants vs the 55/week limit

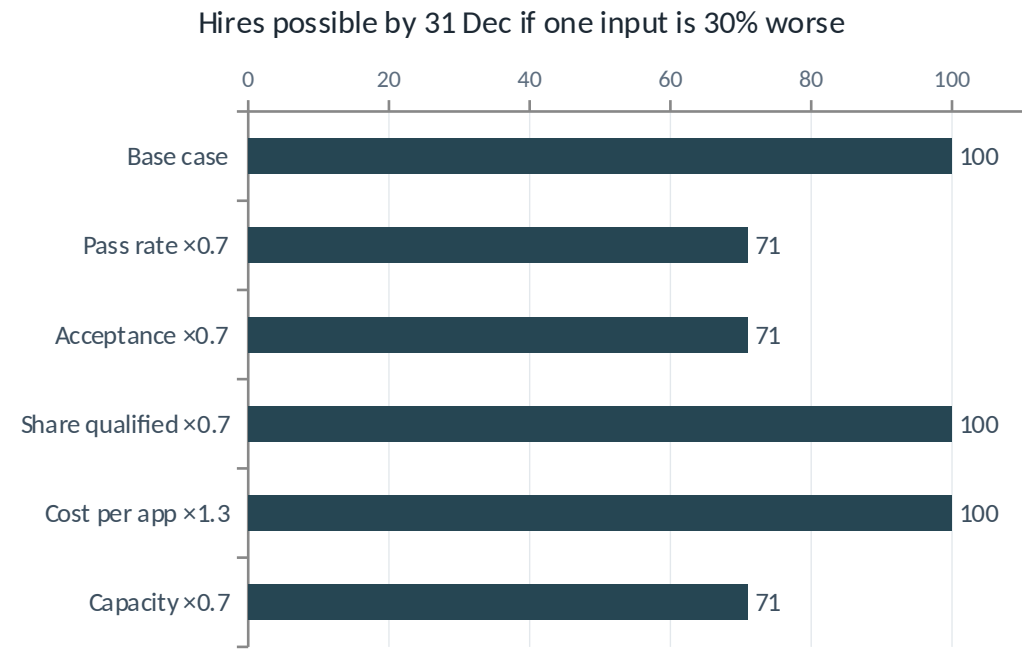

Week 1: 39 of 39 slots; weeks 2–5: 53–54 of 55; week 6: 54; assessments end Mon 30 Nov. Rediscovery re-applicants (waves 21 Oct, 26 Oct and 2 Nov) and the €750 tests fill weeks 1–2, so regular spend ramps 9%, 14%, 18%, then 18–22% a week.

Electricians are hardest; a 30% worse pass rate costs ~29 hires that money can't buy back

Role	Channel coverage	...without I2	Share of reachable pool	Polish route	Foreign-trained by 31 Dec
Electricians	3.7×	3.4×	12%	No	No
Mechatronics	12.3×	12.3×	4%	≤40%	Yes
Automation	3.2×	3.2×	22%	No	Yes
Supervisors	3.9×	3.9×	17%	No	Yes

Why electricians: the scarcest trade in Brandenburg (KOFA 2026: 85.7% of vacancies have no suitable unemployed candidate, vs 41.4% across all occupations) and the largest scarce block (30), so they take 38% of the money. No Polish route and no foreign-trained route by 31 Dec. Supervisors cost more per hire and automation has thinner coverage, but they are 10 and 15 hires with fallbacks (internal promotion, foreign-trained).

Most sensitive: qualified → signed. 30% worse pass or acceptance rates need 440 qualified for 314 slots (140%). The 43% more media that would need can't help: slots cap hires at ~71. Upstream misses (share qualified, cost per application) only cost money.

If 30% worse...	Qualified needed	Media change
Pass rate ×0.7	440	+43%
Acceptance ×0.7	440	+43%
Share qualified ×0.7	308	+43%
Cost per app ×1.3	308	+30%
Capacity ×0.7	308	+0%

Each role buys hires cheapest-first; electricians run out of cheap sources after ~7

Channel (why)	Electricians	Mechatronics	Automation	Supervisors
Organic: careers site, BA Jobbörse, Google for Jobs (free)	€0 / €0 · 5.9	€0 / €0 · 10.4	€0 / €0 · 2.7	€0 / €0 · 1.4

bought beyond the test

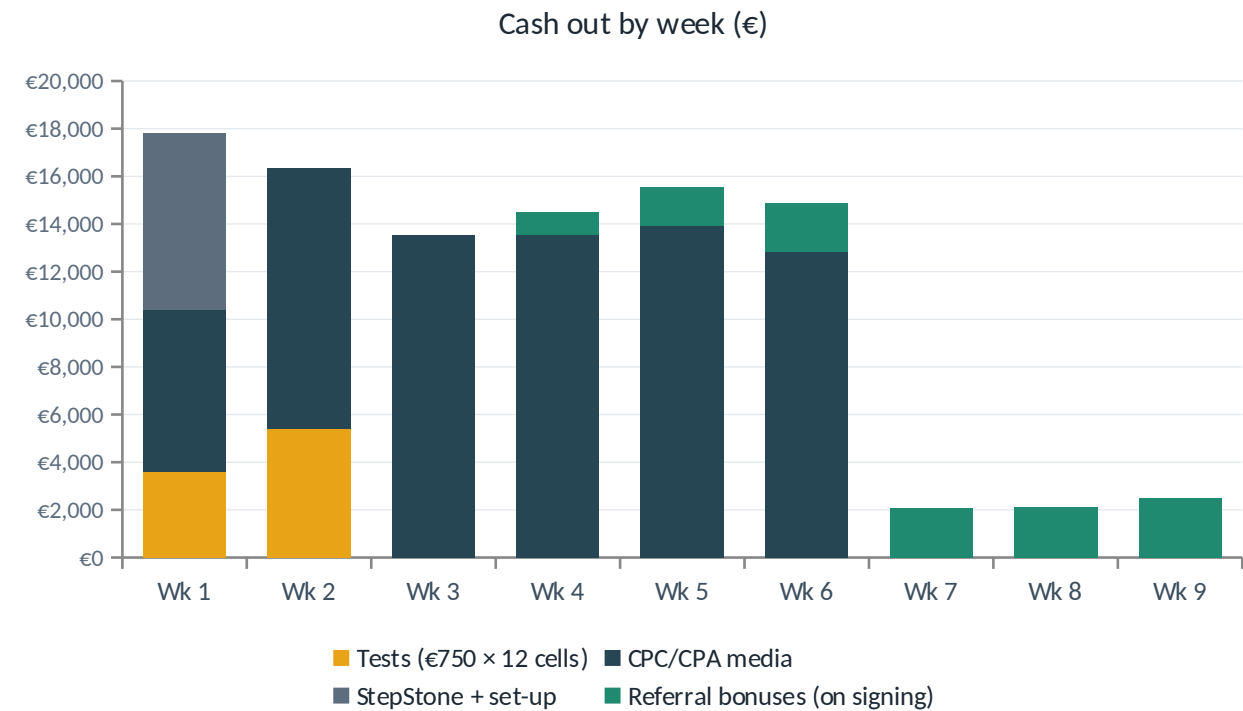

€750 test only (T)

not used (capacity reserve)

Cells: cost per qualified / cost per hire · hires planned. Cost per hire = (cost per application × applications + set-up) ÷ hires at full capacity; I2 includes €1,200 set-up, I3 €400 translation. StepStone ads (4 × €1,449) are costed whole and credited only the applications the plan needs (conservative).

Sourced: cost per application, DACH medians: Indeed €161, Google €179, LinkedIn €96, Meta €84 (TalentBait 2024–26) · StepStone €1,449/ad, 12 applications per ad · share qualified: IAB 2026 (28%), channel index from IAB 2025 (job boards 0.90, careers page 0.71, social 0.50) · volume caps: channel reach (Trendence 2023: Indeed 36%, LinkedIn 15%) × in-market pool (BA 2025, Gallup 11%) · Meta volumes: Redline 2024–26. Every input's source or derivation is on the Assumptions tab.

€99.2k planned across roles and weeks, plus €18.3k reserve released on results

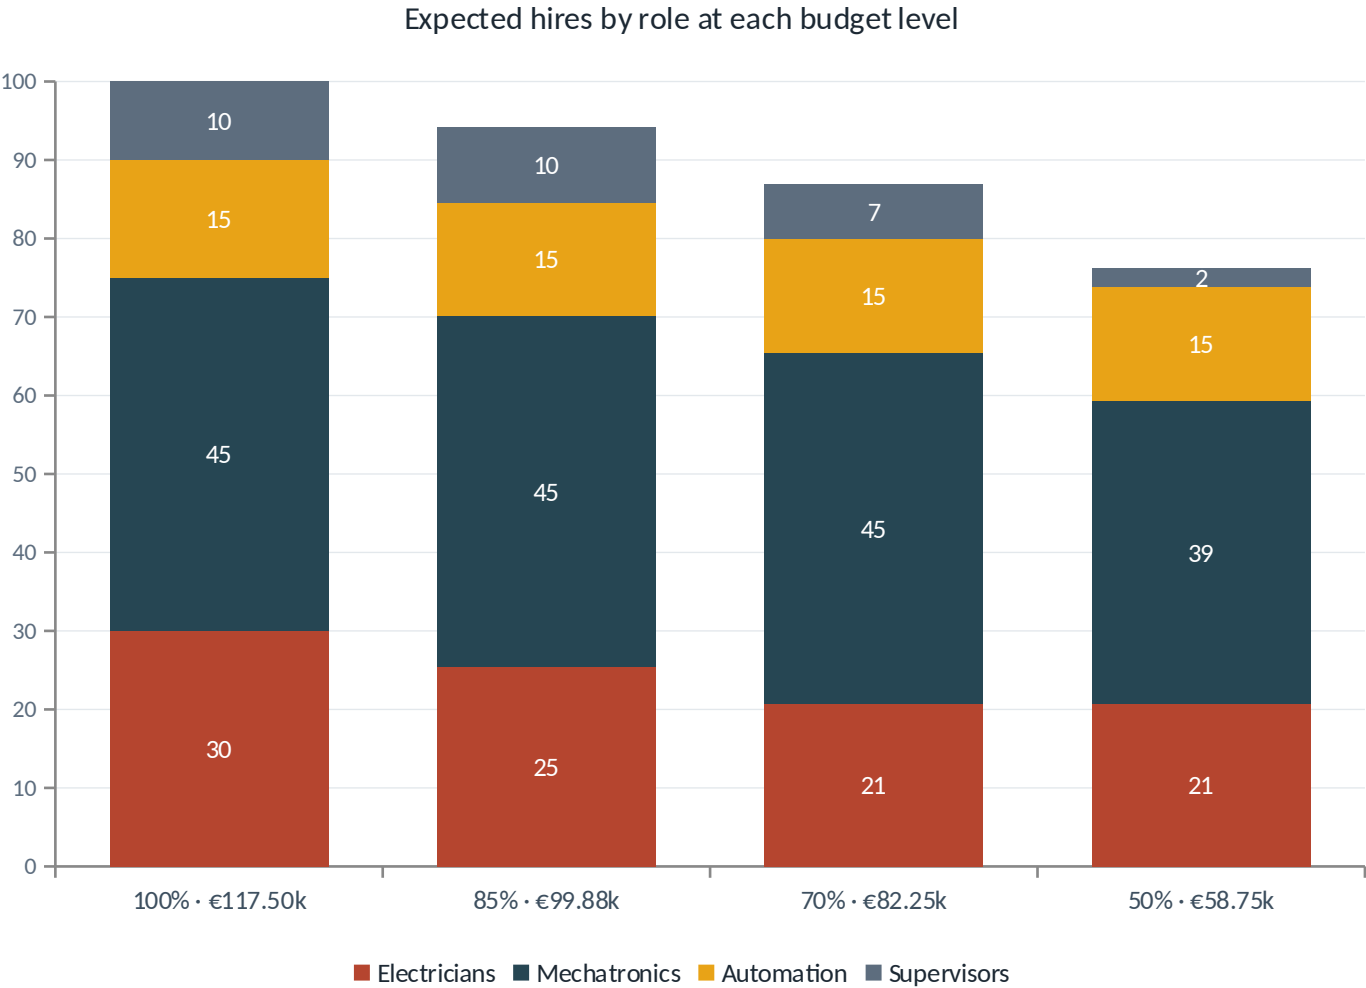

Build: €69.7k paid channels (incl. €9.0k tests) + €27.9k initiative media, pre-screen calls and bonuses + €1.6k set-up = €99.2k. Reserve: 15% of €116.7k plus rounding = €18.3k.

Phasing: weeks 1-2 cost €34.1k (29%), mostly tests. Duds are cut from Mon 2 Nov (after €500 / 30 apps); tests and the full re-allocation are judged by Mon 9 Nov; the reserve moves only from week 3. Paid media stops after Tue 24 Nov.

Role	Spend	...tests	Hires	Cost / hire
Electricians	€37.9k	€2.3k	30	€1,264
Mechatronics	€27.4k	€2.3k	45	€610
Automation	€17.6k	€2.3k	15	€1,175
Supervisors	€16.2k	€2.3k	10	€1,620
Total	€99.2k	€9.0k	100	€992

Channel	Spend	Hires	Cost / hire
organic	€0	20.3	€0
programmatic	€8.5k	3.7	€2,318
StepStone	€5.8k	3.7	€1,564
LinkedIn	€28.6k	16.9	€1,693
Meta	€23.8k	12.0	€1,979
Google Search	€3.0k	0.9	€3,393
rediscovery	€63	4.8	€13
referrals	€11.2k	11.2	€1,000
Handwerk→Industrie	€11.3k	8.5	€1,326
Polish corridor	€6.9k	18.0	€383

30% less (€82.25k) still signs ~87; electricians take most of the loss

Budget	Hires	Cost / hire
100% • €117.50k	100	€1,175
85% • €99.88k	94	€1,060
70% • €82.25k	87	€946
50% • €58.75k	76	€770

 **Rule:** cut the most expensive cost-per-hire cells first, including their tests and set-up; keep the reserve at 15%.

Falls short first: at -30%: electricians 20.7 of 30, supervisors 7.0 of 10, automation 14.5 of 15, mechatronics 44.7 of 45. Mechatronics slips to 44.7.

What I'd tell the client: the last €35.25k buys ~13 hires at ~€2,700 each, mostly electricians, the role that keeps lines running. Keep it. If you must cut, cover supervisors through internal promotion and protect electricians. Above €117.5k, extra money buys at most ~2 more hires (the 6 spare slots); then the 55/week limit binds.

Three new sources supply ~43 of the 100 hires, one built for electricians

I1 • ATS rediscovery + referral sprint

Who: 211 runners-up from the last year (consented talent pool); the plant's 10,703 staff as referrers

How: DE email + SMS waves (days 2, 7, 14), 1-click re-apply; €1,000 bonus on a signed referral

Why better: Already screened (50% still qualified, below the 70% skills match Forrester reports), already wanted Tesla, ~€3 per application

Maths: €63 + €11.2k bonuses → 25 re-apps + 66 referrals → ~42 qualified → ~16 hires

2-week test: Wed 21 Oct – Tue 3 Nov (waves 1–3): €63. Pass: ≥12 qualified. Kill: <9 → no further re-contacts; bonus stays live

Who does what: Me: copy, segments and tracked links ready before 20 Oct; wave 1 on day 2 once the GDPR-checked export arrives. Client: ATS export + consent check, bonus approval, one staff message

I2 • Handwerk → Industrie (electricians)

Who: ~10,000 construction electricians (Elektroniker EGT, BA KldB 2621) within 75 km

How: Meta + Google ads with a 6-question quiz (Gesellenbrief, Elektrofachkraft, shifts, language); Tesla runs a 2–4 week bridge

Why better: A certified pool that never searches 'Betriebstechnik' jobs; roughly doubles the hardest pool

Maths: 120 apps × €84 = €10.1k + €1.2k set-up → 30 qualified × 28% = 8.5 hires (€1,326/hire)

2-week test: Fri 23 Oct – Thu 5 Nov (read Mon 9 Nov): €4.0k. Pass: ≥4 qualified at ≤€500. Kill: <2, >€670 per qualified, or profile rejected; week 4: interview pass below the planned 45% once ≥10 interviews are in

Who does what: Me: audiences, quiz, remote DE copywriter (€700), live 23 Oct. Client: profile sign-off by 23 Oct, bridge plan

I3 • Polish border corridor + pre-screener

Who: Mechatronics/Industriemechanik in Słubice, Kostrzyn, Gorzów, Zielona Góra (60–130 km, EU)

How: Pracuj.pl, OLX Praca and Polish-geo Meta; a remote Polish-speaking freelancer phones each applicant (15 min, low end of Indeed's 15–30 min range)

Why better: Pracuj.pl is Poland's largest job board (762,827 offers in 2025); ~2,000 Polish trade workers already commute to Brandenburg

Maths: 346 apps × €18.75 + €400 → 48 qualified × 37% = 18.0 hires (40% of mech, cap 40%)

2-week test: Tue 27 Oct – Mon 9 Nov (freelancer starts 27 Oct): €2.5k. Pass: ≥10 qualified at ≤€200. Kill: <7, >€270 per qualified, or fewer than the planned 14% pass the language call after 30 calls

Who does what: Me: ads on day 3, contract the freelancer (live 27 Oct), script and scorecard. Client: approve PL ads

Repeatable Joveo product: ATS rediscovery. Every employer may keep consenting runners-up for up to a year, and they are rarely re-marketed to. Here 211 records cost ~€13 per hire and fill week-1 slots before paid channels warm up. Joveo already matches jobs to supply programmatically. Adding a consented rediscovery source, tracked to hire with the same source tags, is repeatable in any market without local staff.

Track by source × role weekly, move money on rules, test the riskiest assumptions early

Track (every Monday)

Spend, clicks, applications, qualified, assessed, interviewed, passed, offers and signed, by source × role. Data: Joveo platform (tracked URLs), Monday ATS export with the utm source in the source field, recruiter disposition codes, pre-screener sheet. Tracker tab → decisions + hire forecast.

Money rules

No judgement before €500 / 30 apps (tests run to €750). Updated $Q = (\text{qual} + 30 \times \text{plan}) \div (\text{apps} + 30)$. Cost per qualified $\leq 0.75 \times \text{plan}$ with free slots → +25%/wk from reserve; $\geq 1.5 \times$ → cut 50%; $\geq 2 \times$ → off. Zero qualified at €750 → off where ≥ 3 were expected; low-yield cells → off if applications are <50% of plan. Next week forecast >55 qualified → pause the costliest cells; <47 → release reserve.

Checks: Mon 2 Nov, confirmed 9 Nov

1) Pass rate on the week-1 cohort (interviews 29 Oct–2 Nov), the most sensitive input: if below plan (electricians 50%) once ≥ 10 interviews are in → tighter knock-outs, pre-screen calls, ask +9 slots, re-run the model (pass 10% worse = ~92 hires). 2) Electrician supply: profile decision + I2's two-week read on 9 Nov; if killed → programmatic picks up the gap: all 30 still possible (model run with I2 off), budget €127.5k, electricians at €1,532 per hire. 3) The 12 tests' cost per application and share qualified → re-rank on Assumptions §7. Week 4 (16 Nov): acceptance below plan (70%) once ≥ 7 offers are out → earlier cut-off + signing bonus.

First five things in week 1

1) Tue 20 Oct 09:00 CEST (12:30 IST): kick-off; lock slots, steps, 18 Dec date, bonus, EGT decision, utm tags; request ATS export. 2) Tue–Wed: launch planned cells and tests with tracked URLs + knock-outs. 3) Wed 21 Oct: rediscovery wave 1 + referral launch. 4) Wed–Fri: Polish ads, freelancer contracted; I2 live by Fri 23 Oct. 5) Mon 26 Oct: first read-out, line up the 2 Nov decisions.
