

€102.5k signs 100 maintenance hires by 31 Dec if the 55 weekly assessments hold

€102.5k

recommended budget: €85.4k
planned + €17.1k reserve
released only on results

€854

media cost per hire (≤€1,025 if
the reserve is spent); excludes
Joveo fees

97%

of 314 assessment slots used
(305 qualified). Capacity, not
money, is the limit

24 Nov

last useful application (17 Nov
for supervisors): signatures by
Fri 18 Dec

How sure: ~50% we sign all 100, ~80% at least 90 (my judgement; slots are 97% used). If pass or acceptance rates are 30% worse, ~72. **With 30% less** (€71.75k): ~93 hires; electricians fall short first (23 of 30).

Role	Hires	Spend	€ / hire	Main sources (hires)
Electricians	30	€46.5k	€1,550	Handwerk→Industrie 9.5 · rediscovery 4.3 · StepStone 4.3 · referrals 4.1 · organic 3.8 · other 4.1
Mechatronics	45	€9.7k	€215	Polish corridor 18.0 · organic 13.4 · rediscovery 7.7 · StepStone 4.8 · tests 1.2
Automation	15	€14.6k	€975	LinkedIn 8.6 · rediscovery 2.3 · organic 2.3 · referrals 1.5 · tests 0.3
Supervisors	10	€14.6k	€1,457	LinkedIn 4.5 · StepStone 1.8 · rediscovery 1.3 · organic 1.1 · referrals 1.0 · other 0.2
Total	100	€85.4k	€854	+ €17.1k reserve = €102.5k

Plan: €750 test in every paid CPC/CPA cell in weeks 1–2, then buy hires cheapest-first: free channels → ATS rediscovery (~€13/hire) → Polish corridor (≤40% of mechatronics) → StepStone (7 ads) → referrals, LinkedIn → construction-electrician campaign, Search. Pace ≤55 qualified a week; paid spend stops Tue 24 Nov.

Top 3 risks → response

Capacity: 97% used. Pre-screened sources first, pace ≤55/wk, ask +10–15 slots (65/wk → 80% use).

Electrician supply: ~9 of 30 need your OK on construction electricians by 23 Oct; else more StepStone (~€1,022/hire), then Search and programmatic at €3.8k–€4.3k/hire.

Christmas: 3-day offers, e-signature, 7-day offer validity, stop spend Tue 24 Nov.

What I need from you

- 55 assessments/wk 22 Oct–1 Dec (+10–15 if possible)
- Day-1 ATS export (GDPR-checked) + utm source tags in ATS
- €1,000 referral bonus + one staff message
- Construction-electrician decision by 23 Oct
- 3-day offers, e-signature to 18 Dec; approve €102.5k

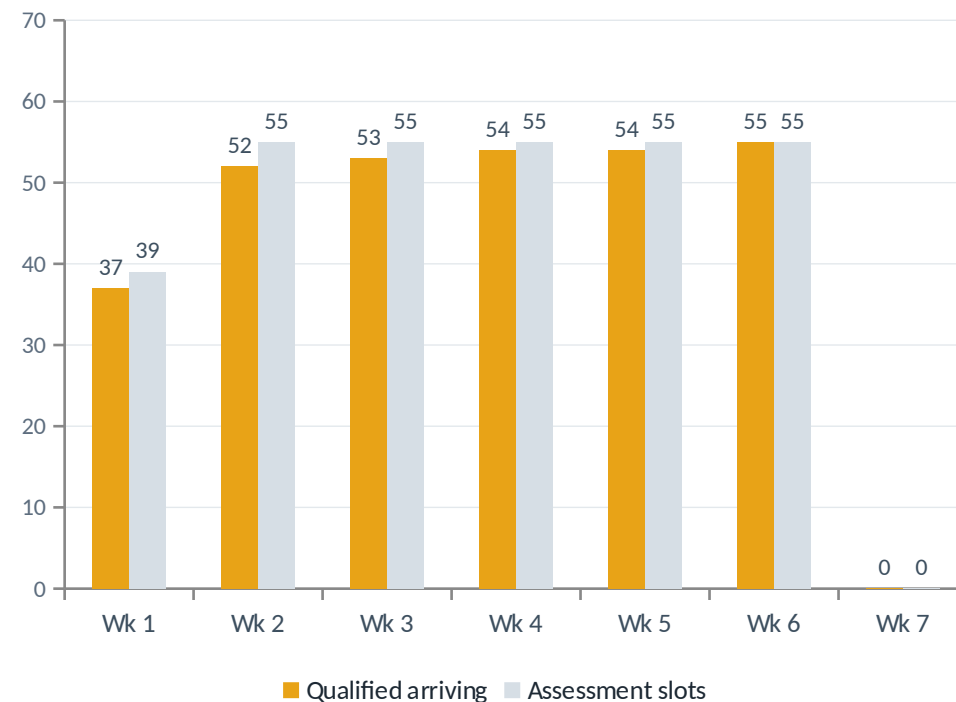

Working back from 100 hires: ~305 qualified applicants for 314 assessment slots

Role	Hires	App → qual.	Qual. → passed	Passed → offer	Offer → signed	Qual. → signed	Qual. needed	Apps needed
Electricians	30	15%	50%	90%	70%	32%	95	635
Mechatronics	45	22%	55%	90%	75%	37%	121	551
Automation	15	12%	45%	90%	70%	28%	53	441
Supervisors	10	10%	40%	85%	70%	24%	42	420
Total	100					32%	311	2,047

Where the rates come from. Sourced where data exists (IAB: 28% of applications suitable; Gem interview-pass and Königsteiner/StepStone offer-acceptance data), own estimates otherwise; each labelled on the Assumptions tab. Few applicants qualify (brief), and foreign-trained electricians can't be recognised in time (2–4 months, \$6 BQFG). Acceptance reflects counter-offers in Engpass trades. With the channel mix, the plan needs **305 qualified / 1,525 applications** (initiatives bring better-screened people).

Latest useful application. Application → assessment 6 days, → interview 8, → offer 3, → signature 7 (first two: SmartRecruiters DE benchmark); supervisors +7. Last realistic signature Fri 18 Dec, so applications must arrive by Tue 24 Nov (E/M/A) and Tue 17 Nov (supervisors). Slots = $55 \times 40 \text{ days} \div 7 = 314$.

Qualified applicants vs the 55/week limit

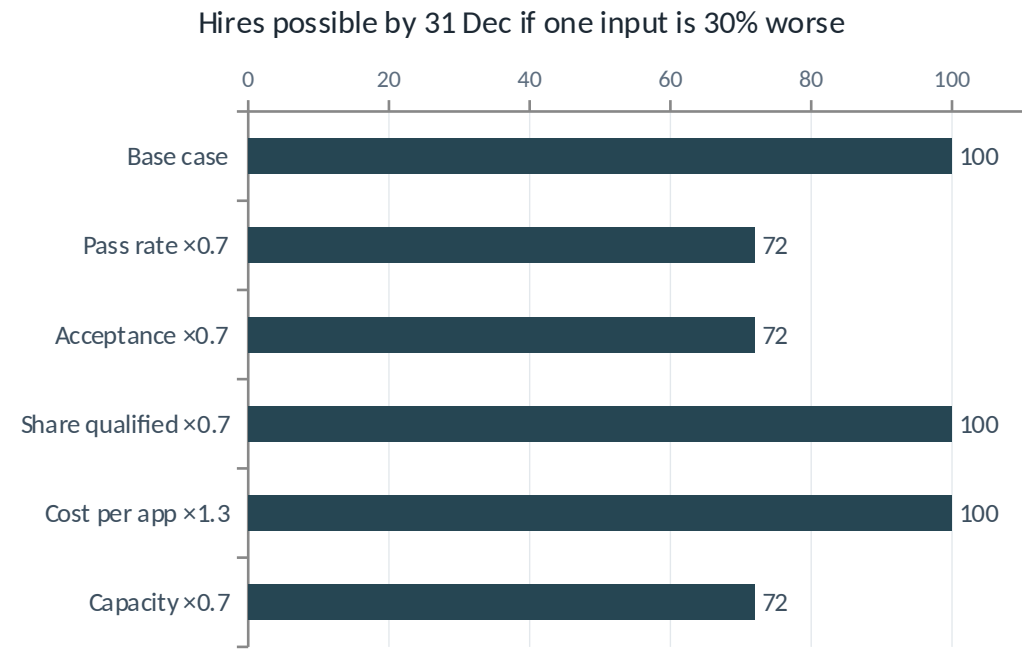

Week 1: 37 of 39 slots; weeks 2–5: 52–54 of 55; week 6: 55; assessments end Mon 30 Nov. Rediscovery re-applicants (waves 21 Oct, 26 Oct and 2 Nov) and the €750 tests fill weeks 1–2, so regular spend ramps 7%, 11%, 16%, then 21–25% a week.

Electricians are hardest; a 30% worse pass rate costs ~28 hires that money can't buy back

Role	Channel coverage	...without I2	Share of reachable pool	Polish route	Foreign-trained by 31 Dec
Electricians	1.8×	1.5×	14%	No	No
Mechatronics	3.0×	3.0×	7%	≤40%	Yes
Automation	1.9×	1.9×	10%	No	Yes
Supervisors	1.6×	1.6×	19%	No	Yes

Why electricians: the largest scarce block (30), and the lowest coverage once the unproven construction-electrician campaign (I2) is removed. There is no Polish route and no foreign-trained route by 31 Dec, and energy/grid, rail, aerospace and agencies all chase the same certificate. Supervisors need a bigger share of a smaller pool, but they're only 10 hires with an internal-promotion fallback.

Most sensitive: qualified → signed. 30% worse pass or acceptance rates need 436 qualified for 314 slots (139%). The 43% more media that would need can't help: slots cap hires at ~72. Upstream misses (share qualified, cost per application) only cost money.

If 30% worse...	Qualified needed	Media change
Pass rate ×0.7	436	+43%
Acceptance ×0.7	436	+43%
Share qualified ×0.7	305	+43%
Cost per app ×1.3	305	+30%
Capacity ×0.7	305	+0%

Each role buys hires cheapest-first; electricians run out of cheap sources after ~8

Channel (why)	Electricians	Mechatronics	Automation	Supervisors
Organic: careers site, BA Jobbörse, Google for Jobs (free)	€0 / €0 · 3.8	€0 / €0 · 13.4	€0 / €0 · 2.3	€0 / €0 · 1.1

I2 Handwerk → Industrie (new pool)	€560 / €2,349 · 9.5	–	–	–

bought beyond the test

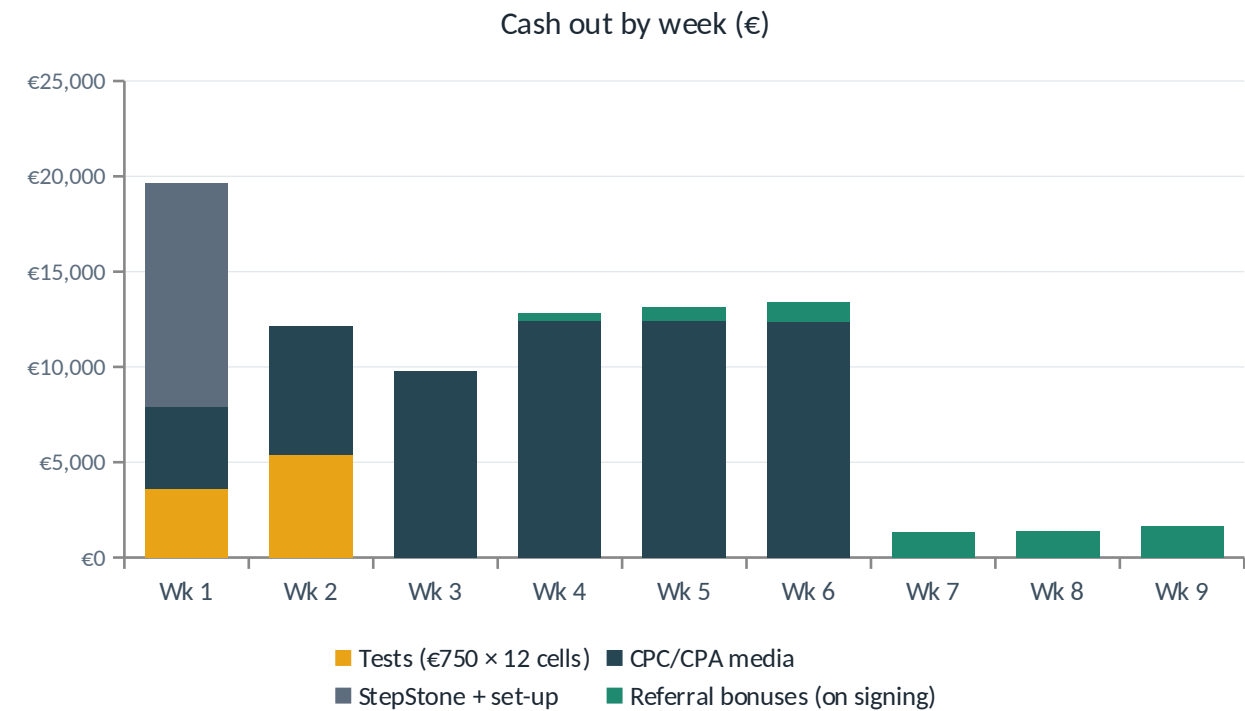

€750 test only (T)

not used (capacity reserve)

Cells: cost per qualified / cost per hire · hires planned. Cost per hire = (cost per application × applications + set-up) ÷ hires at full capacity; I2 includes €1,200 set-up, I3 €400 translation. StepStone ads (7 × €1,449) are costed whole and credited only the applications the plan needs (conservative).

Sourced: StepStone €1,449/30-day ad (stepstone.de price list) · cost per application, DACH medians: Indeed €161, Google €179, LinkedIn €96, Meta €84 (TalentBait, 2,549 campaigns, 2024–26) · share qualified: 28% of applications suitable (IAB-Stellenerhebung 2026) · pools: BA employment statistics by KldB code (Dec 2025) · time-to-offer: SmartRecruiters Germany benchmark. Every source (with its link) and every remaining own estimate is labelled on the Assumptions tab.

€85.4k planned across roles and weeks, plus €17.1k reserve released on results

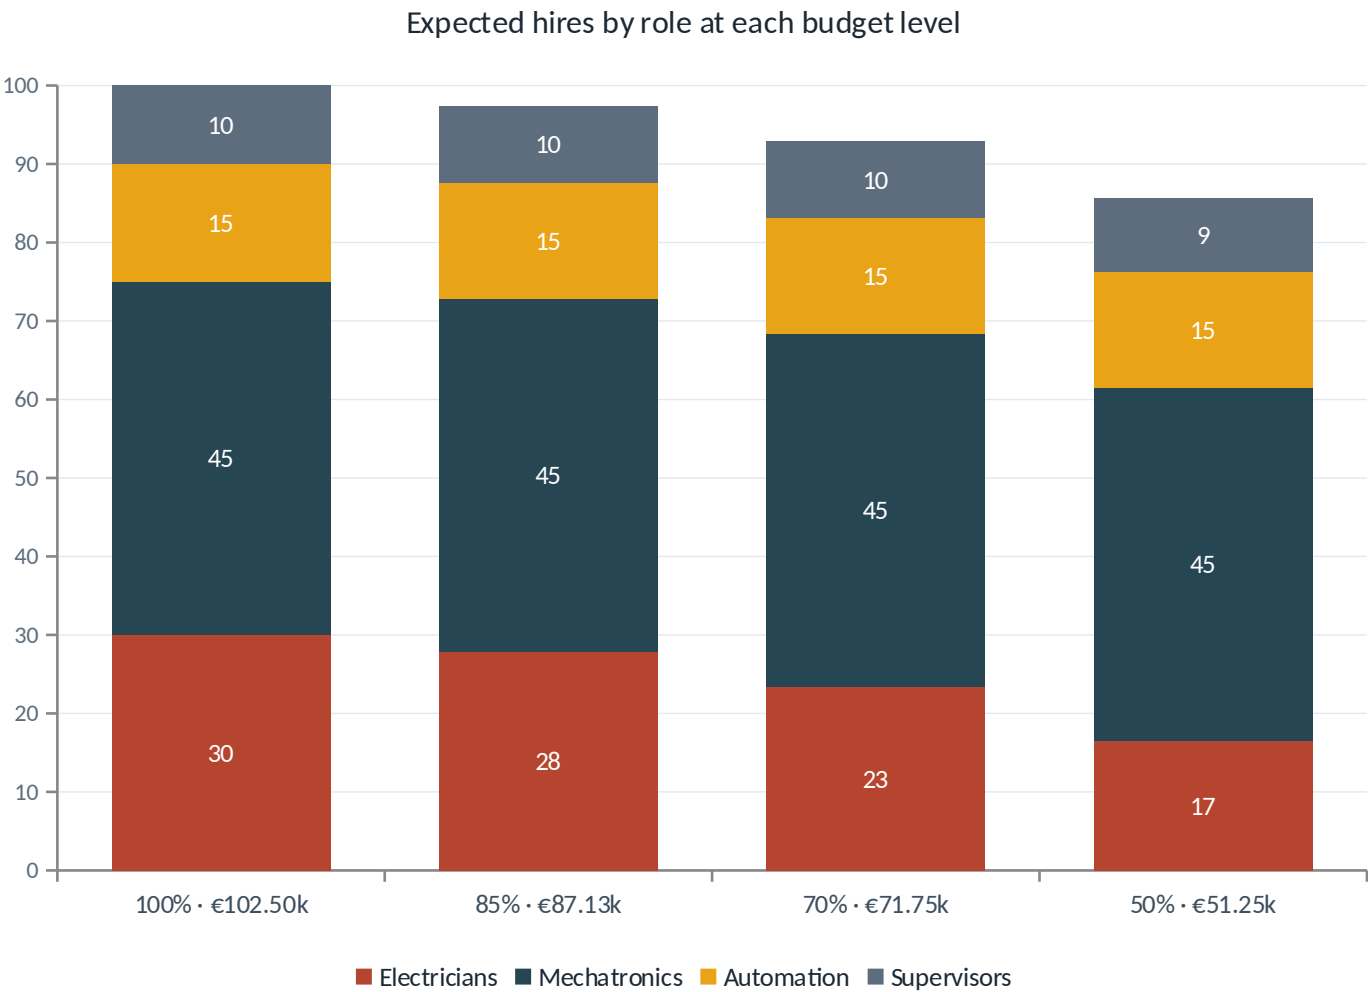

Build: €52.0k paid channels (incl. €9.0k tests) + €31.8k initiative media, pre-screen calls and bonuses + €1.6k set-up = €85.4k. Reserve: 15% of €100.5k plus rounding = €17.1k.

Phasing: weeks 1-2 cost €31.8k (31%), mostly tests. Duds are cut from Mon 2 Nov (after €500 / 30 apps); tests and the full re-allocation are judged by Mon 9 Nov; the reserve moves only from week 3. Paid media stops after Tue 24 Nov.

Role	Spend	...tests	Hires	Cost / hire
Electricians	€46.5k	€2.3k	30	€1,550
Mechatronics	€9.7k	€2.3k	45	€215
Automation	€14.6k	€2.3k	15	€975
Supervisors	€14.6k	€2.3k	10	€1,457
Total	€85.4k	€9.0k	100	€854

Channel	Spend	Hires	Cost / hire
organic	€0	20.6	€0
programmatic	€3.0k	0.8	€3,632
StepStone	€10.1k	10.8	€937
LinkedIn	€20.8k	13.1	€1,584
Meta	€1.5k	0.5	€2,786
Google Search	€16.6k	4.5	€3,710
rediscovery	€210	15.7	€13
referrals	€6.5k	6.5	€1,000
Handwerk→Industrie	€22.2k	9.5	€2,349
Polish corridor	€4.5k	18.0	€248

30% less (€71.75k) still signs ~93, but electricians take most of the loss

Budget	Hires	Cost / hire
100% • €102.50k	100	€1,025
85% • €87.13k	97	€895
70% • €71.75k	93	€773
50% • €51.25k	85	€600

 **Rule:** cut the most expensive cost-per-hire cells first, including their tests and set-up; keep the reserve at 15%.

Falls short first: electricians (23 of 30 at -30%); automation and supervisors lose under 1 hire each (14.7 of 15, 9.8 of 10). Mechatronics never falls short.

What I'd tell the client: the last €30.75k buys ~7 hires at ~€4,290 each, mostly electricians, the role that keeps lines running. Keep it. If you must cut, cover supervisors through internal promotion and protect electricians. Above €102.5k, extra money buys at most ~3 more hires (the 9 spare slots); then the 55/week limit binds.

Three new sources supply ~50 of the 100 hires, one built for electricians

I1 • ATS rediscovery + referral sprint

Who: ~700 past applicants qualified but not hired; ~1,000 plant technicians as referrers

How: DE email + SMS waves (days 2, 7, 14), 1-click re-apply; €1,000 bonus on a signed referral

Why better: Already screened (50% qualified, my estimate), already wanted Tesla, ~€3 per application

Maths: €210 + €6.5k bonuses → 84 re-apps + 43 referrals → ~61 qualified → ~22 hires

2-week test: Wed 21 Oct – Tue 3 Nov (waves 1–3): €210. Pass: ≥20 qualified (≥½ electricians). Kill: <11 → no further re-contacts; bonus stays live

Who does what: Me: copy, segments and tracked links ready before 20 Oct; wave 1 on day 2 once the GDPR-checked export arrives. Client: ATS export + consent check, bonus approval, one staff message

I2 • Handwerk → Industrie (electricians)

Who: ~10,000 construction electricians (Elektroniker EGT, BA KldB 2621) within 75 km

How: Meta + Google ads with a 6-question quiz (Gesellenbrief, Elektrofachkraft, shifts, language); Tesla runs a 2–4 week bridge

Why better: A certified pool that never searches 'Betriebstechnik' jobs; roughly doubles the hardest pool

Maths: 250 apps × €84 = €21.0k + €1.2k set-up → 38 qualified × 25% = 9.5 hires (€2,349/hire)

2-week test: Fri 23 Oct – Thu 5 Nov (read Mon 9 Nov): €5.8k. Pass: ≥4 qualified at ≤€700. Kill: <3, >€840 per qualified, or profile rejected; week 4: <40% interview pass

Who does what: Me: audiences, quiz, remote DE copywriter (€700), live 23 Oct. Client: profile sign-off by 23 Oct, bridge plan

I3 • Polish border corridor + pre-screener

Who: Mechatronics/Industriemechanik in Słubice, Kostrzyn, Gorzów, Zielona Góra (60–130 km, EU)

How: Pracuj.pl, OLX Praca and Polish-geo Meta; a remote Polish-speaking freelancer phones each applicant (~15 min, paid hourly)

Why better: Polish job seekers mostly use Polish boards (my estimate); the pre-screen saves your 55 slots

Maths: 200 apps × €20.25 + €400 → 44 qualified × 41% = 18.0 hires (40% of mech, cap 40%)

2-week test: Tue 27 Oct – Mon 9 Nov (freelancer starts 27 Oct): €1.5k. Pass: ≥7 qualified at ≤€120. Kill: <4, >€140 per qualified, or <30% pass the language check

Who does what: Me: ads on day 3, contract the freelancer (live 27 Oct), script and scorecard, daily call 09:00 German time. Client: approve PL ads

Repeatable Joveo product: ATS rediscovery. Every large employer holds thousands of previously screened candidates who are rarely re-marketed to. Here they cost ~€13 per hire and fill week-1 slots before paid channels warm up. Joveo already matches jobs to supply programmatically. Adding a consented rediscovery source, tracked to hire with the same source tags, is repeatable in any market without local staff.

Track by source × role weekly, move money on rules, test the riskiest assumptions early

Track (every Monday)

Spend, clicks, applications, qualified, assessed, interviewed, passed, offers and signed, by source × role. Data: Joveo platform (tracked URLs), Monday ATS export with the utm source in the source field, recruiter disposition codes, pre-screener sheet. Tracker tab → decisions + hire forecast.

Money rules

No judgement before €500 / 30 apps (tests run to €750). Updated $Q = (\text{qual} + 30 \times \text{plan}) \div (\text{apps} + 30)$. Cost per qualified $\leq 0.8 \times \text{plan}$ with free slots → +25%/wk from reserve; $\geq 1.5 \times$ → cut 50%; $\geq 2 \times$ → off. Zero qualified at €750 → off where ≥ 2 were expected; low-yield cells → off if applications are <50% of plan. Next week forecast >55 qualified → pause the costliest cells; <45 → release reserve.

Checks: Mon 2 Nov, confirmed 9 Nov

1) Pass rate on the week-1 cohort (interviews 29 Oct–2 Nov), the most sensitive input: if <45% → tighter knock-outs, pre-screen calls, ask +10 slots, re-run the model. 2) Electrician supply: profile decision + I2's two-week read on 9 Nov; if killed → more StepStone ads, then Search and programmatic; expect ~25–27 electricians (my judgement: capacity allows 30, but slower and at €1,022–€3,788 per hire). 3) The 12 tests' cost per application and share qualified → re-rank on Assumptions §7. Week 4 (16 Nov): acceptance <55% → earlier cut-off + signing bonus.

First five things in week 1

1) Tue 20 Oct 09:00 CEST (12:30 IST): kick-off; lock slots, steps, 18 Dec date, bonus, EGT decision, utm tags; request ATS export. 2) Tue–Wed: launch planned cells and tests with tracked URLs + knock-outs. 3) Wed 21 Oct: rediscovery wave 1 + referral launch. 4) Wed–Fri: Polish ads, freelancer contracted; I2 live by Fri 23 Oct. 5) Mon 26 Oct: first read-out, line up the 2 Nov decisions.
