PART 5 · SUMMARY

€120k signs 100 maintenance hires by 31 Dec, if the client assesses 55 a week

€120k
budget: €100k plan + €20k reserve

€1,000
cost per hire (€1,200 all-in)

98%
of 314 assessment slots used

Role	Hires	Spend	€ / hire
Electricians	30	€38.7k	€1,291
Mechatronics	45	€29.9k	€664
Automation	15	€16.6k	€1,106
Supervisors	10	€14.8k	€1,476
Total	**100**	**€100k**	**€1,000**

Top 3 risks → action

Capacity: pace ≤55 assessments a week; ask for +9 slots.

Electricians: construction-electrician route needs the client's OK by 23 Oct.

Christmas: offers within 3 days; last applications Tue 24 Nov.

What I need from you

- 55 assessments a week from 22 Oct
- Day-1 export of past applicants
- €1,000 referral bonus
- Construction-electrician decision by 23 Oct
- Approve €120k

100 hires need ~311 qualified applicants; the plan brings 308 for 314 slots

Role	Hires	App → qualified	Qualified → passed	Passed → offer	Offer → signed	Qualified needed	Applications needed
Electricians	30	25%	50%	90%	70%	95	381
Mechatronics	45	25%	55%	90%	75%	121	485
Automation	15	25%	45%	90%	70%	53	212
Supervisors	10	23%	40%	85%	70%	42	183
Total	**100**					**311**	**1,260**

Sources: IAB (1 in 4 applications suitable), Gem (pass rates), Königsteiner (offer acceptance). All labelled on the Inputs tab.

Capacity: assessments run 22 Oct – 30 Nov (40 days): 55 × 40 ÷ 7 = 314 slots. The plan uses 98%.

Last useful application: 18 Dec signature − 7 − 3 − 8 − 6 days = Tue 24 Nov (supervisors Tue 17 Nov).

Electricians are hardest; a 30% worse pass rate leaves ~71 hires

Why electricians

• Scarcest trade in Brandenburg: 85.7% of vacancies have no suitable jobseeker, vs 41.4% overall (KOFA 2026).

• Dearest cost per hire: €1,291.

• No Polish route, and foreign-trained electricians need 2–4 months of recognition.

Most sensitive: the pass rate

• 30% worse pass rate → 440 qualified needed for 314 slots → ~71 hires.

• Money can't fix it: the slots are full.

• A lower share qualified or dearer clicks only cost money, not hires.

• First read on 2 Nov; if low, tighten screening questions and ask for more slots.

Each role buys its hires from the cheapest source first

Source	Roles	Spend	€ / hire	Hires
Organic	E M A S	€0	€0	20.0
Past applicants	E M A S	€65	€14	4.7
Polish border corridor	M	€6.9k	€383	18.0
Employee referrals	E M A S	€11k	€1,000	11.0
Construction electricians	E	€11.1k	€1,329	8.4
StepStone	E M	€5.8k	€1,567	3.7
LinkedIn	A S	€28.6k	€1,688	16.9
Programmatic	E M	€36.5k	€2,116	17.3
Total		**€100k**	**€1,000**	**100**

How it works

- Cost per hire = cost per application ÷ share qualified ÷ qualified → signed.
- Each source is capped by how many people it can reach.
- Every paid source starts with a €750 test in weeks 1–2.
- E electricians · M mechatronics · A automation · S supervisors.

€100k planned, paced to the assessment slots, plus a €20k reserve

Week	Spend	Qualified arriving	Slots
Wk 1	€27.5k	85	86
Wk 2	€17.5k	54	55
Wk 3	€17.5k	54	55
Wk 4	€17.5k	54	55
Wk 5	€17.5k	54	55
Wk 6	€2.5k	8	8
Total	**€100k**	**308**	**314**

Testing: €6k in weeks 1–2 (€750 per paid source and role).

Money moves: weak sources cut from Mon 2 Nov; strong ones get +25% a week.

Reserve: €20k (15% + rounding), released only on results.

Spend stops: Tue 24 Nov, the last useful application date.

Why week 1 is biggest: its applicants fill 11 days of assessments (22 Oct – 1 Nov).

30% less (€84k) signs ~87; electricians and supervisors fall short first

Role	Recommended	30% less
Electricians	30	20.6
Mechatronics	45	45.0
Automation	15	15.0
Supervisors	10	6.3
Total	**100**	**86.9**

Rule: cut the dearest cost-per-hire sources first; keep the 15% reserve.

Falls short: electricians (programmatic is their dearest source) and supervisors (LinkedIn).

What I'd tell the client: the last €36k buys ~13 hires, mostly electricians. Keep it; if you must cut, cover supervisors by internal promotion.

Three new sources supply ~42 of the 100 hires, one built for electricians

Past applicants + referrals

- Who: ~211 past runners-up (estimate) + staff referrals
- How: email/SMS on days 2, 7, 14; €1,000 per signed referral
- Maths: ~16 hires for ~€11k
- Test 21 Oct – 3 Nov: pass ≥14 qualified, kill <8
- Setup 1 day. Client: GDPR-checked export

Construction electricians

- Who: ~10,000 within 75 km (BA)
- How: social ads + 6-question quiz; 2–4 week bridge course
- Maths: 118 apps × €84 + €1.2k → 8.4 hires (€1,329 each)
- Test 23 Oct – 5 Nov: pass ≥7 qualified at ≤€500
- Setup 3 days. Client: profile OK by 23 Oct

Polish border corridor

- Who: mechatronics workers 60–130 km away (EU)
- How: Polish job boards + a Polish-speaking pre-screener
- Maths: 346 apps × €18.75 + €400 → 18 hires (40% cap)
- Test 27 Oct – 9 Nov: pass ≥12 qualified at ≤€200
- Setup 1 week. Client: approve the ads

Repeatable Joveo product: past-applicant rediscovery — every employer holds consented past applicants; Joveo can add them as one more tracked source in any market.

Track by source and role, move money on simple rules, check the riskiest assumptions early

Track every Monday

- Spend, applications, qualified by source × role
- Assessed, passed, offers, signed by role (ATS source tag)
- Data: Joveo tracked links + Monday ATS export

Money rules

- Judge after €500 or 30 applications
- 20% cheaper than plan → +25% a week; 50% dearer → halve; 2× → off
- Over 55 qualified next week → pause the dearest

Week-2 checks

- Pass rate (read 2 Nov): if low → sharper screening, more slots
- Construction-electrician quality (9 Nov): if poor → programmatic fills the gap
- Real test costs: re-rank sources

First five actions

- Tue 20 Oct: kick-off; lock slots, dates, bonus
- Tue–Wed: launch sources and tests
- Wed 21 Oct: past-applicant wave + referrals
- Fri 23 Oct: construction campaign live
- Mon 26 Oct: first read-out
